

Geremi Wanga

Software-developer

Projects

Oliro recipes

[View Live](#)

- Built using JavaScript (ES6) and MVC architecture
- Integrates with the Forkify API for real-time recipe fetching
- Bookmarking system and dynamic URL routing using hashchange
- Allows users to add custom recipes via API key
- Responsive design with advanced DOM manipulation

Notion AI Tool repository

[View Live](#)

- Notion style collection of verified AI tools
- Categorized by functionality (audio, image, dev tools, etc.)
- Includes links, ratings, summaries built to help others explore AI easily

MapOut Workouts

[View Live](#)

- **Map Integration:** Log workouts by clicking directly on the map (powered by Leaflet)
- **Running & Cycling:** Track distance, duration, cadence, and elevation gain.
- **Workout List:** View all your workouts in a sidebar list.
- **Delete Workouts:** Remove workouts easily with a single click.
- **Local Storage:** Your data is saved in your browser and persists across sessions.
