Geremi Wanga

FullStack Developer

Full-Stack Developer (Go + JavaScript) with experience building production ready web applications, secure APIs, and automated email workflows. Recently delivered a commercial real estate platform using a custom Go backend, Resend API integration, and Zoho Mail hosting. Strong focus on clean architecture, responsive UI, and real-world problem solving.

Experience

2024-Present
Self-Employed

Freelance Full-Stack Developer

Key Achievements:
- Designed and delivered a commercial real estate platform using Go (Golang) and JavaScript
- Built two secure REST APIs (Property Data API + Contact API) with JSON output
- Developed automated email workflows using Resend API and Zoho Mail
- Implemented SPF, DKIM, and DMARC for domain-wide email authentication
- Built a responsive, modern frontend with smooth inquiry submission and fast loading times
- Deployed the entire project to production with environment-based configuration and HTTPS security
- Collaborated with the client to refine UI/UX, improve performance, and deliver a polished final product

Tech: Go, JavaScript, HTML, CSS, Resend API, Zoho Mail, Git, Netlify

2023-2024
Personal Projects

Front-end Developer

- Built multiple web applications using JavaScript, MVC architecture, and external APIs
- Developed interactive apps such as MapOut Workouts, Oliro Recipes, and a Notion-style AI Tools directory
- Focused on responsive UI, clean code, and performance
- Strengthened debugging, DOM manipulation, and deployment workflow

Education

Computer Packages, Diakonia Training Institute

2023 - 2024

Computer End User Proficiency. Proficiency in essential software like Microsoft Office (Word, Excel, PowerPoint), email and internet usage, and basic computer maintenance.

Javascript Development

2024 - 2025

Got Fundamental programming concepts, Structuring Code in a Architecture, modern ES6+ features, DOM manipulation for dynamic web pages, and asynchronous programming with promises and async/await.
